

# FINANCIAL ANALYTICS

---

# OBJECTIVES

- Top 10 Companies with highest Market Capital
- Top 10 Companies with highest Quarterly Sales
- Bottom 10 Companies with lowest Market Capital
- Bottom 10 Companies with lowest Quarterly Sales

# THE PROCESS

- Data Collection
- Data Cleaning
- Data Analysis
- Insights

# DATA COLLECTION

The Data has been collected in the form of a CSV file named "**fincial\_data\_analysis.csv**".

The CSV file has the data (**Market capital and Quarterly Sales**) of top 500 companies.

# DATA CLEANING

Removed the **S. No.** column as it is not required for analysis.

Some values of the column '**Sales Qtr. – Crore**' are written on the adjacent column. I used **Paste Special** dialogue box and check the '**skip blanks**' option to move those values to its original column.

Then I used **python** to deal with **NaN** values and removed the **outliers**.

# DATA ANALYSIS

**Balkrishna Inds** has the highest Market Capital at **21.37K Crores**

# DATA ANALYSIS

**NCC** has the highest Quarterly Sales at **2780 Crores**

# DATA ANALYSIS

**Orient Cement** has the lowest Market Capital at **3024 Crores**

# DATA ANALYSIS

**Bombay Burmah** has the lowest Quarterly Sales at **19 Crores** only

# INSIGHTS

- **Balkrishna Industries** and **Cholaman Investment and Finance** has the Highest Market Capital at **21.37K Crores** and **20.83K Crores** respectively which is **606.6 %** more than **Orient Cement** which has the lowest Market Capital at **3024 Crores**.
- **NCC** has the Highest Quarterly Sales at **2780 Crores** which is **14531.5 %** more than **Bombay Burmah** which has the lowest Quarterly Sales of **19 Crores**.

**THANK YOU**
